COLA, on Gen. Ridgely's breed of cattle, as compared with Teeswater, 411.  
nswered by Veritas, at the end of this index.  
CULTURAL SOCIETIES.  
ALBEMARLE, transactions of, 97.  
ERKSHIRE, 313.  
UMBERLAND, meet at Fayetteville, and elect officers, and other proceedings, 15.  
ORCHESTER, Maryland, constitution formed, and officers elected, 109.  
AST TENNESSEE, proceedings of, 80.  
REEN county, proceedings, 69.  
ARYLAND, scheme of premiums for the Western Shore, October, 1824, 10—Trustees of met at Eu-  
w, 15—meeting of Trustees on the Eastern Shore, 2—meeting of, at J. Hollingsworth's, 56—premi-  
s for the Eastern Shore, 65—proceedings of Trustees, 72—proceedings of Trustees at Major D. Martin's, 104—extract from the proceedings of the Board of Trustees on the Eastern Shore, 162—pro-  
ceedings of, at a special meeting in reference to Gen. Lafayette, 239—act of its incorporation, 241—  
eting of Trustees at Hayfield's, 204—editorial remarks on their exhibition in November, and pre-  
ence of Gen. Lafayette, 256—editorial remarks on the last exhibition on the E. Shore, 288—official account of the Cattle Show, 289—election of its officers and other proceedings at Barney's, 12th dec. 1824, 305—importance of its having a room, 2—Cattle Show at Easton, 32, 330—proceedings of Trustees at Gen. Harper's, 328—proceedings of Trustees at Mr. James Carroll's, 352, 368—list of premiums offered by, for June, 1825, 371—proceedings of Trustees at Mr. Eaton's, 384—its list of premiums for 1826, 401—neat at their rooms and Gen. Ridgely President, 416.  
MASSACHUSETTS, proceedings of, at a dinner at Brighton, 254—requi Mr. Lowell's address for publication, 267—report of its last exhibition, 273, 281.  
PENNSYLVANIA list of premiums for 1824, give notice of their exhibition and list of premiums for Oct. 1824, 212—editorial notice of its show at Chester, 26—official account of their exhibition at Chester in Oct. 1824, 26—contents of their volume of memoirs, 310—elect officers for the ensuing year, and take measures for the next Cat-  
e Show, 380.  
PHILADELPHIA, proceedings of, 228, 262.  
SOUTH CROLINA, addressed by Joseph Johnson, 42—proceedings, 293.  
St. JOHNS their report, 163—constitution of, 379.  
the VALLY, elects members, appoints officers, and is addressed by the President, 2—papers read, 59—paper read from R. K. Meade, 66—papers read to, 78, 4—paper, No. 5, read at Oct. 15, 1823, by W. M. Eaton, 90—papers, No. 6, read to, 97—paper read by J. W. Page, 113—proceedings of, 16, 24, 353.  
WASHINGTON county, proceeding of, 305.  
ES, note of valuable kind, 32—remarks on by Dr. S. I. Mitchell, 226—preservation of, 255.  
E OR HARDS, on planting, 380.  
US, the horse, anecdote of, 63.

ARROW ROOT, on the culture of in the U. S. 13.  
ASPARAGUS, great growth of, 160.

### B.

BACON, to prevent skippers in, 79—how to make bacon and hung beef, 221—to keep pure, 376.  
BANK U. S. view of its affairs, 7.  
BARNS AND STABLES, on the construction of, 244.  
BARTON, W. M. paper read by, to Agricultural Society of the Valley, 91.  
BATHING, the good effects of, 84.  
BEDBUGS, how to kill, 199.  
BEES, plan of the Charlies' hope hive, 114—on the preservation of, 348.  
BELLENGIR, J. S. on the culture of corn and other crops, 39.  
BENE SEED, on the use of, by R. Goodwin, 46.  
BERKSHIRE AGRICULTURAL SOCIETY, 313.  
BIGHEAD, disease in horses in North Carolina, 99.  
BIRNIE, C., on steeping seed wheat, 307.  
BLAMANGE, exquisite specimens of, described, 239.  
BORING for water described, 309.  
BOSLEY, Col. N. M., answers to certain questions respecting his premium farm, 313.  
BOTTS, in horses, how prevented, 14—cure for, 29—how cured, 365.  
BOYLE, James, on the laws of trespass in Maryland, 308.  
BOYLSTON, Ward Nicholas, communicates experiments in the culture of grasses, 179.  
BREAD MAKING, by Cobbet, 86, 100, 108.  
BUEL, Judge J., on steeping seed wheat, 307.  
—On the culture of ruta baga and its value as a second crop, 361.  
BUFFALO, recommended as a labouring animal, 213—oxen recommended, 263.  
BROILING, in cookery, how best done, 224.  
BYRON, Lord, his epitaph on a favourite dog, 319.

### C.

CALVES, on rearing, 147, 151—essay on rearing, 318.  
CALHOUN, J. C., his report on internal improvements, 389—orders and communicates experiments with ploughs, 393.  
CANALS, N. Y. expense of travelling on, 118.  
—Of the Chesapeake and Delaware, 199—progress of, 278.  
—The Chesapeake and Ohio, report of the Board of Internal Improvement on the practicability of, 405.  
CANALS AND RAIL WAYS, in England, 142.  
CARRIAGE WHEELS, on the principles of constructing, with a cut, 271.  
CARROTS, on preserving, 406.  
CAT, a species at Constantinople, called Genet, recommended to destroy the Norway rat, 203.  
CATERPILLARS, how to destroy, 92—destroys the crops, 96.  
CATTLE, large ones slaughtered in Baltimore, 20—H. A. Carpenter's experience with Short Horns, 20—remarks on, by Veritas, 21—improvement of, in Worcester, Massachusetts, 178—liable to diseases of climate, 200—cheap method of fattening, 229—on fattening with flax-seed jelly, 260—importation of North Devons, 332—Devon, remarks on, by Philo Ignoramus, 339—table of calculations to show the increase of, from one Devon bull, 385—Improved Short Horns, 410—on the value of Gen. Ridgely's breed, 411—remarks on, by Veritas, in reply to Agricola, see end of this index.  
CHAMBER LYME, recommended for the roots of peach trees, 127.  
CHAMPION, Charles, letter from, dated 24th Feb., 55.  
CHARCOAL, best preservative of peach trees, 946.  
CHEMISTRY, importance of, as connected with agriculture, 152.  
CHERRY TREES, on insects that destroy, 189.

CLARK, Col. his plan of ascending rapids in rivers, 202.  
CLAY BURNING, 342, 407.

CLINTON, D. W. his remarks at the celebration of the birth day of Linnaeus, 149—on broad tail seep, 159.

CIDER, remarks on, by Dr. S. L. Mitchell, 226—improvement in the method of making, 229.

CLOVER MACHINE, description of Burrall's, 386.

COBBET'S cottage economy, 67, 92.

—On bread making, 92, 100.

—On house-keeping in America, 123.

—On keeping cows, 174, 181.

COCKROACHES, natural history of, 134.

COFFEE, on the plantations of, in Cuba, 284.

COMPOST, of vegetables with lime, 374.

COOKERY, on roasting, 106.

CORRESPONDENT, observations of one on a visit to Saratoga, dated Steam Boat United States, 137—letter from Philadelphia, 145—dated Saratoga, describes military academy at West Point, 169—Katskill mountain and town, 185—describes Earl Stimson's farm, 201.

COTTON, culture of in Egypt, 29.

—Important improvement in the culture of, suggested, 60—sails of recommended, 102—trade in at Havre, 206—rot in, 207—of Florida, quality of samples received from the Hon. J. C. Calhoun, 362—shoe thread recommended, 405—prospects of the cotton market, by Amphicon, 412.

COWS, remarks on keeping, 30—milking by straws practicable, but to be condemned, 118—milking with straws injurious and improper, 148—on keeping, by W. Cobbet, 174, 181.

CUMBERLAND AGRICULTURAL SOCIETY, meet at Fayetteville and elect officers, and other proceedings, 15.

CURRENT WINE, how best made, 127.

CUTS, of mouldebart, 1—of Abbot's harrow, 21—Mr. Pomeroy's decorticator, 60—Charlie's hope hive, 115—of a common gate, 142—of the manner of plaiting straw and grass for hats and bonnets, 156—how to trim vines, 188—of an improved plough sent by A. Pickens, 188—of a new post and rail fence, 207—one for cleaning wheat from garlie, 222—to show the true principle of constructing carriage wheels, 277—of Skinner's breed of hogs, 372—of strata of rocks, 377—of Burrall's clover machine, 386.

### D.

DECORTICATOR, Mr. Pomeroy's, 65.

DISBROW, his method of obtaining water by boring, 309.

DINNER, invitations to from the Cook's oracle, 57.

DOG, epitaph on, 319.

DORCHESTER AGRICULTURAL SOCIETY, Md. constitution formed, and officers elected, 109.

DORSEY, Roderick, his letter on the inspection of certain tobacco, 8.

DORSEY, T. B. his good tobacco and high price of, 32.

DRAINING WET LAND, much practised in Holland, and how, 1—of great lakes in, 6.

DUCATEL, J. T., professor of agricultural chemistry, communicates a simple method of testing the fertility of soils, 379.

DYEING, new and economical material for, 102.

### E.

EAST TENNESSEE AGRICULTURAL SOCIETY, proceedings of, 80.

ENCLOSURES, laws of Maryland in regard to, 158.

EMMERSON, Judge Thomas, makes inquiry respecting hill side ploughing, 355.

EXPERIMENTS, valuable ones to show the difference between cooked and uncooked food, 320—to show the draught of different ploughs, 320—important ones with various ploughs by the War Department, 393—with Stevens' plough, 405.

## CONTENTS.

## VOL. VI.

EXPORTS AND IMPORTS, of each state from Sept. 21 to Oct. 23, 7.

## F.

FALLOWS, summer and fallow crops, 140.

FARMING, good and bad, difference between, 167.

FEEDING, best mode of, for cows, 30.

— for hogs, 394.

FISH LOUSE, found on the coast of Worcester county, correspondence respecting, with Doctor Mitchell, Thomas Say, Governor Clinton, and Doctor J. S. Spence, 129.

FISHERIES, on the value of, by J. Q. Adams, 41.

FISKE, Hon. Oliver, extracts from his address, 177.

— On the oak pruner, 204.

FISTULA of the withers, cure for, 35.

FLANDERS, on the agriculture of, 2.

FLAX, how steeped in Flanders, 25—on the preparation of, without rotting, by Roumages machine, 404.

FLAX-SEED JELLY, to fatten cattle, 260.

FLAX and hemp, of American growth, report on, by the Secretary of the Navy, 363, 372, 368.

FLORIDA, condensed view of its climate, soil, productions, &c. &c., 186.

FLY, troublesome to sheep, how prevented, 35.

FOOD, for domestic animals, important experiments to ascertain the best mode of preparing, by Tench Tilghman, Esq. 394.

FOOT ROT, 44.

FOUL in the foot, 45.

FRANKLIN, Doctor, on the usefulness of mathematics, 45.

— Institute, notice of, 145—premiums offered by, for 1825, 395, 403.

FRUIT, culpable inattention of farmers to the cultivation of, 5.

FRUIT TREES, how propagated in China, 14—on ringing, 111—causes of the premature and sudden decay of pear and apple trees, 121—on pruning, 391, 402.

## G.

GAPES, in chickens and turkeys, 71—in chickens, cause of, 159—how to cure, 230.

GARLIC, machine for cleaning, cut of, 222.

GARDENING, calendar at Monticello, 72.

GATE, common one for farms, 142.

GENET, or "Cat of Constantinople," introduction of recommended, 203.

GIRARDIN, L. H., botanical communication, 69, 96, 100, 116.

— On the principal gramina, &c. 98, 157.

— Botanical communication on grasses, 125, 132.

GRAIN, early cutting of recommended, 198.

GRAPES, on the culture of, 62—culture, profit of, 88—

on the culture of, by J. Adum, 123, 301—on the culture of, with a drawing, 118—valuable native one, 199—on the culture of, by Timothy Matlack, 329—on the culture of, by T. McCall, 369—on the culture of, by Col. W. Potter and J. Adum, 397.

GRAVELLING of the horse's hoof, to prevent or cure, 59.

GREASE, in the horse's foot, 59.

GREECE county Agricultural Society, 69.

GUANO, a manure used in South America, brought by Midshipman Bland, 316.

GUNS, how to clean, 359.

GYPSUM, on the use of, by H. V. Somerville, 73.

## H.

HAMILTON, on the encouragement of domestic industry, 268.

— on the promotion of domestic industry, 277.

HAMMOND, Nicholas, recommends soft soap for cleaning fruit trees, 403.

— On the best means of preventing the destruction of sheep by dogs, 303.

HARDIN, M. sends grafts of a valuable apple from Kentucky, 32.

HARPER, Gen. R. G., his address to the Maryland Agricultural Society, 297.

HARROW, form of Mr. Abbot's, 23.

HASLAM, John, on the hollow horn in cattle, and hooks or haws in horses, 75.

HAUTBOY strawberries, on the culture of, 197.

HAWS or hooks, in horses, Haslam on, 75.

HAY, queries on salting, 230.

HEALTH, rules for preserving, 77, 84, \*94, 101, 109,

126—Doct. Boerhave's rules for preserving, 112.

—Rules for preserving in the West Indies, 356.

HELLEBORE, caution to be observed in the use of, 148.

HEMP and flax, of American growth, reported on by the Hon. Secretary of the Navy, 363, 372, 378.

HERBEMONTE sends Egyptian mullet seed, 40.

HILDRETH, S. P., on the climate, soil, &c. of Ohio, 11.

HILL SIDE and horizontal ploughing, correspondence respecting, 355.

HIVES for bees, plan of improved one at Charles' hope, 114.

HOGS, Hayfield's pen of, 331—Hayfield's pen beaten in Pennsylvania and in Essex, Massachusetts, 355.

—Account of Skinner's English breed, 372.

HOLDICH, B., on rotation of crops, 173.

HOLKHAM, agriculture of, 243.

HOLLOW HORN in cattle, Haslam on, 75.

HOOFCASTING, 9.

HOOF CONTRACTED, disease of in horses, 110.

HORTICULTURAL Society of New York, election of officers and other proceedings, 194—election of their officers, 209—addressed by Doct. Hosack, 209.

HORSES, bleded, list of Mr. Randolph's, 20—Lawrence on the age of, 28—foot, on the structure of, 35—stud, of one owned by Col. Tayloe, 50—disease of, called "bighead," 99—for the turf, instances of high prices paid for in England, 160—how to cure the colic of, 415.

—foot on the structure of, 35.

—And oxen on the comparative value of, 388.

HOSACK, Doctor, addresses Horticultural Society of New York, 209.

HYDROPHOBIA, curious cure of, 376.

## I.

ICE HOUSES, on the construction of, 348.

ICHTHIOLOGY, curious species of fish-eaters, 129.

IMPORTS and exports of each state, 7.

—Of England, 327.

IMPROVED Short Horns, their qualities, &c., 317.

INDIAN corn, on the culture of, 410.

INDIGESTION, proper diet in case of, 55.

INTERNAL IMPROVEMENTS, report on by the Hon. J. C. Calhoun, 389—comparison of the great routes between the Atlantic and the Lakes, 398—report of the Board of, on union of the Chesapeake and the Ohio, 405.

INSECTS, how to prevent from destroying vegetables, 54—that injure plum and cherry trees, 183.

## J.

JEFFERSON, Thomas, his habits of living, 231.

JOHNSON, Job, on obtaining water and making springs, 174.

JOHNSON Joseph, address to the Agricultural Society of S. Carolina, 42.

JONES, Calvin, on flat roofs, 357.

## K.

KATSKILL mountain, visit to by a Correspondent at Saratoga, 185.

KELP, its component parts, 215.

KERSEY, Joseph, communicates experiments with millet, 13—recommends Guernsey parsnips, 13.

## L.

LA FAYETTE his son and secretary made members of the Maryland Agricultural Society, 240—attends Cattle Show of Maryland Agricultural Society, 286.

LAMPS, how to use, 15.

LANDRUM, Abner, on the means of preventing land from washing, 39.

LARDERS, on the construction of, 54.

LAWNS, rye grass recommended for, 397.

LAWS, agricultural, one directing geological and mineralogical survey in N. Carolina, 14.

LIME, remarks on burning, 119—on burning with Susquehanna coal, 308—on its effects in preventing fly, 307.

LINCOLN, the Hon. L., on the state of farm labour in Massachusetts; breaking and working oxen; on the

culture of Indian corn; qualities of Short Horn Cattle, &c. 410.

LINNÆUS, celebration of his birth day at New York, 148, 153, 161.

LINNÆAN Society at Paris, proceedings of, 150.

LUCERNE, on the culture of, by J. E. Howard, 362.

LOWEL, Hon. J. his remarks made previous to announcing the names and duties of the committees at the last Massachusetts Agricultural exhibition, 267.

—On orchard and forest trees, their duration, &c. 391.

## M.

MACHINES, one for raising stumps described, 303.

MANGEL WURTZEL, on storing it, 398, 414.

MANUFACTURES, value and amount of in each state, 14—of the United States, capital employed therein, 165—of Great Britain, 191—American, on the policy of encouraging, by Hamilton, 268—extent of in the neighbourhood of Manchester, 238—American, on the protection of, by Hamilton, 275.

MANURES, theory of their action and the value of various kinds, 146—on the preparation and application of, 195.

—And soils, practical treatise on, 217—treatise on, 225, 234, 241, 257, 314, 409.

MARYLAND ACADEMY of science, officers, constitution, &c. 351, 464, 368.

—AGRICULTURAL SOCIETY, scheme of premiums for the Western Shore, October, 1824, 10—Trustees of met at Eutaw, 15—meeting of Trustees on the Eastern Shore, 32—meeting of at J. Hollingsworth's, 56—premiums for the Eastern Shore, 65—proceedings of Trustees, 72—proceedings of Trustees at Major D. Martin's, 104—extract from the proceedings of the Board of Trustees on the Eastern Shore of Maryland, 162—proceedings of, at a special meeting in reference to General Lafayette, 239—act of its incorporation, 241—meeting of Trustees at Hayfield's, 264—editorial remarks on their exhibition in Nov. and presence of General Lafayette, 286—editorial remarks on the last exhibition on the E. Shore, 288—official account of the cattle show, 289—election of its officers and other proceedings at Barney's, 12th Dec. 1824, 305—importance of its having a room, 312—cattle show at Easton, 322, 330—proceedings of Trustees at Gen. Harper's, 328—proceedings of Trustees at Mr. Jas. Carroll's, 352, 368—list of premiums offered by, for June, 1825, 371—proceedings of Trustees at Mr. Caton's, 384—its list of premiums for 1826, 401—meet at their rooms and elect Gen. Ridgely President, 418.

MARL, its effects on various soils, by Edmund Ruffin, 5—its properties and uses, 9.

MARSH LAND, how reclaimed, 82.

MARTIN, Major D., meeting of Trustees at his house and proceedings, 10.

MASON, Seth, answers agricultural queries, 84.

MATHEMATICS, on the usefulness of, by Dr. Franklin, 45.

MASSACHUSETTS AGRICULTURAL SOCIETY, proceedings of at dinner at Brighton, 254—request Mr. Lowell's address for publication, 267—reports of its last exhibition, 273, 281.

M'CALL, Thomas, his remark on climate as connected with various fruits, 16—on the culture of the vine, 369.

M'DOWELL, John, on making errant wine, 127.

MEADE, R. K., makes communication to the Agricultural Society of the Valley, 16.

MEAT, on the preservation of, 54—observations on the choice of, 214—on pickling at dry salting, 220.

METEOROLOGICAL reports, utility of, 25.

—Remarks and table at Baltimore and Washington, Pa. 33.

—Observations at Washington, Pa. for 1824, 375—at Baltimore, 413.

MIDDLETON, John, on the culture of the sweet potato, 184.

MILLS, to go by horse power, 404.

MILLET, Egyptian, experiments with, 8—on the culture of, by John Willis, 27—on the culture of, 192.

MINERAL WATER, analysis of the most celebrated, 134.

MINOR, Peter, on hill side ploughing, 35.

MICHELL, Dr. S. L. his communication to the N. York Linnaean society, 154.

MITCHELL, Dr. S. L. on insects that injure plum and cherry trees, 183—on orchards, apples and cider, 226  
MISSOURI, cultivated and natural productions of, 806.  
MORRIS, J. B., communicates an extraordinary case of calf giving milk, 147.  
MORTGAGES, how best arranged for the landed interest, 345.  
MOULDEBART, with a drawing and explanation, 1.  
MILK, on its productions and preservation, 30.  
MUSE, Jos. E., on seeding grain, 141—on the laws respecting enclosures, 158.

## N.

NATURAL HISTORY, best method of preserving specimens of, 52.

## O.

OAK PRUNER, remarks on by O. Fisk, 204.  
OATS, tall meadow, letter on, from John Taylor, 260.  
OHIO, its climate, soil, productions, 11.  
OIL of bane seed, 38.  
OLIVER, Robert, liberal donation to the Maryland Agricultural Society, declines being President, 338.  
OLMSTED; Denison, on the use of inquiry and science as connected with Agricultural improvement, 318.  
ONIONS, inquiries respecting the culture of, 229—on the culture of, 354.  
ORANGE TREE, report on the culture of, in Florida, 204.  
ORCHARDS, great sales of fruit from, in England, 6—remarks on, by Dr. S. L. Mitchell, 226—on planting of apple, 380.—Grass, great value of, 387.  
OXEN, report on, at Worcester, Mass. 178—buffaloe, recommended, 260.—and horses, on the relative value of, 388.

## P.

PARSNIPS, Guernsey, recommended by Joseph Kersey, 13.  
PASCALIS, Doctor, his remarks at the celebration of the birth day of Linnaeus at N. York, 150.  
PATERSON, N. J., growth, population, and manufactures of, 133.  
PATRICK, John, on lucerne, 13.  
PEACHES, how to preserve, 92—how to have them good, 310.—Trees, to preserve from the worm, 14—on the preservation of, by G. Thomas, 37—on the culture and preservation of, 75—to save from frost by retarding flowers, by J. F. Brevard and remarks on by L. H. Girardin, 114—best preserved with charcoal, 349.—and drying fruits, by Reuben Haines, 401.—Insect, remarks on by several correspondents, 324.  
PEARS, on the blasting of, 222.  
PENNSYLVANIA AGRICULTURAL SOCIETY, list of premiums for 1824, 49—give notice of their exhibition and list of premiums for Oct. 1824, 212—editorial notice of its Show at Chester, 263—official account of their exhibition at Chester in Oct. 1824, 265—contents of their volume of memoirs, 310—elect officers for the ensuing year, and takes measures for the next Cattle Show, 380.—SOCIETY for INTERNAL IMPROVEMENT, constitution, officers and proceedings of, 341—constitution and proceedings of, 348.  
PHILADELPHIA AGRICULTURAL SOCIETY, proceedings of, 228, 262.—Internal improvements projected and prosecuted by the citizens of, 222.  
PHILIP gives an account of an extraordinary feat on the course, 63.  
PICKENS, Andrew, on Guinea grass, sea kale, and an improved plough, 189.  
PICKLING and dry salting meat, 220.  
PIGEONS, the carrier pigeon, 228.  
PISE mode of building houses, economy of, 6.  
PISSISSAWA, its medical virtues, 381.  
PLASTER OF PARIS, see Gypsum.  
PLOUGHES, remarks on the erroneous manner of testing usually practised, by G. Davis, 43—experiments with Stevens', 405.—and ploughing, important experiments made by the War Department, 393.  
PLUM trees, on insects that injure, 183.

POETRY, signs of ruin, 32—more misnomers, 40—Johnny Bull my Joe John, 844.  
POPPY, remarks on new and beautiful varieties, 213.

## Y.

**YOUNG**, John, of Nova Scotia, author of letters of *Agricola*, premium given to, 206.

## Z.

**ZOLLIKOFFER**, W., M. D., remarks on the Arumona Triloba, 167.

times coerced to find support upon maize stalks, husks and growing rye, when “the barns are without fodder, and the fields are bare of grass, in the spring.”

Page 122, vol. 4, *American Farmer*, the report of the Philadelphia Cattle Show, barely mentions, in the following words, the animal which has enabled *Agricola* to fill two columns of your paper. “The premium for the best steer, not more than five nor less than one year old, \$10, to Mr. Lowry for his *brindle and white* steer of three years, raised by himself.”

He was not exhibited, as of Teeswater blood, nor was he so called, at the Show, nor even since, until a wag, with a view of hoaxing the Dillettanti, stated to a respectable butcher, that a gentleman, whose name has influence in such weighty concerns, thought he showed a *little of the old Heaton Teeswater blood* imported in 1794.

Page 74, vol. 5, *American Farmer*, Curwen states, after having possessed cattle of “families of various degrees of affinity to the pure race of Short Horns, carried to New York by Col. Deveaux and Mr. Heaton, and having given great prices for them, as well as others, yet the best of them all he sold for but sixty dollars a head, about the time he gave nearly five hundred dollars for two *Improved Short Horn* steers.”

Your obedient servant,  
**VERITAS.**

## IN REPLY TO AGRICOLA—No. 52.

“Old facts better than new” stories.

To the Editor of the *American Farmer*.

**SIR,**—I congratulate you, upon the display of subtle talents, which has not merely traced the properties, qualities, and propensities, of certain bulls, and calves, but has most ingeniously, attempted to expound the “blind prejudices,” “partialities,” and “motives of some of your active friends. Although you, very naturally court for the columns of the *Farmer*, the elaborate, and excursive effusions of accomplished, and erudite writers, whose sarcasm, could give point, or whose eloquence, might convey zest, for your paper; yet I am assured, that you will not forget, that if professional authors, sometimes gain notoriety, whilst dealing in fiction, farmers, and men of “understanding,” have a strange, old fashioned regard, *for fact*. Without noticing the “challenge,” or appeals to “good judgment,” I shall confine myself to the passages, to which *Agricola* adverts, quoting the Report of the Philadelphia Show, whence his assertions without evidence, his imputations without justice, his jests without point, and his plaudits without reason, are mainly derived.

I have not the slightest objection, that *he* should assert, that the wealthy, and zealous proprietor, of the Hampton Estate, possesses a better breed of cattle, than the united efforts of all the breeders of Europe, or America can produce: nor shall I labour

to confute, by a newspaper essay, the notions, with which any untiring writer, may find amusement for your readers, or himself.

It was not contended, “page 74, vol. 5,” that “whatever excellence, may be found, in *any other* breed, is to be traced to a certain degree of relationship, to the Short Horns.” Curwen but said—“among my stock, a Chinese and Devon heifer, a yearling and cow, from an imported Devon, by an English bull, also heifers, and cows, bred upon our meadows and mountains, have been placed to decide the questions which have caused, among breeders, so much dispute. All my experience has shown, that the extent of excellence, in the animal, whether in points, properties, shape, disposition; early maturity, or tendency to secrete fat, or afford rich milk, is determined by the degree of affinity to the pure race of *Improved Short Horns*.”

Here is a direct allusion to the *previous passage*, referring to the contrast, made with Short Horns, and the animals which had been placed among the stock to determine the question, &c.

It is strangely alleged by *Agricola*, that “a correspondent would fain induce the serious belief, that the Teeswaters possess the amazing quality of being able to subsist without food.”

Here again he *imagines*, the word Teeswater, which, on reference to the paper, to which his note applies, *cannot be found*.

I would ask whether, even a citizen farmer, may not have read, that in Maryland, cattle are some-
